Glaucoma Visual Fields Work Book

Ms Tahmina Pearsall

What is the definition of glaucoma?

Question 2

Name 3 types of visual field tests

Question 3

Name 3 sources of artefact on a visual field

What are your thoughts on this visual field?

When you compare this visual field test with the optic nerve appearance what do you think?

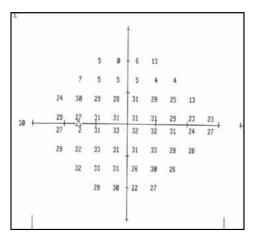

Do they correspond?

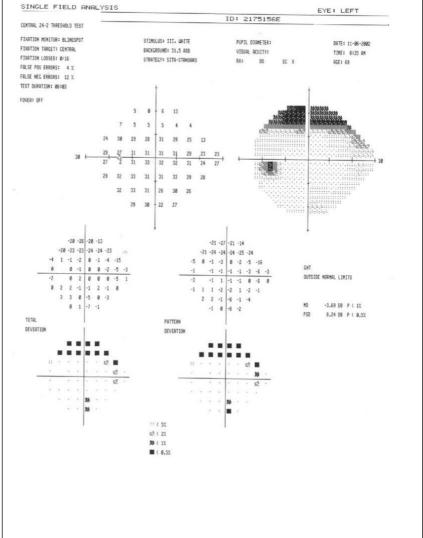

What are your comments on this superior visual field?

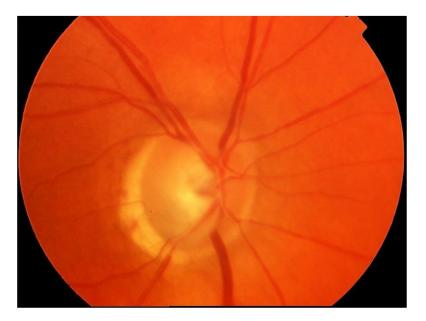

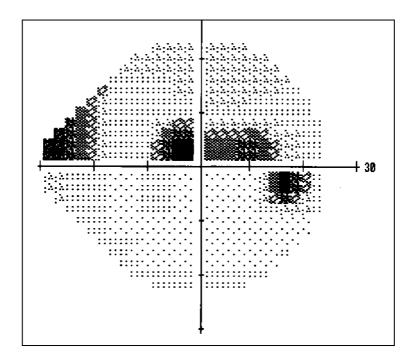

What types of field defects would you expect in a glaucoma patient with this nerve appearance?

Describe the field defect and does it correspond?

- 8 -

a. What percentage of the nerve fibres can you expect to lose before you see visual field defects?

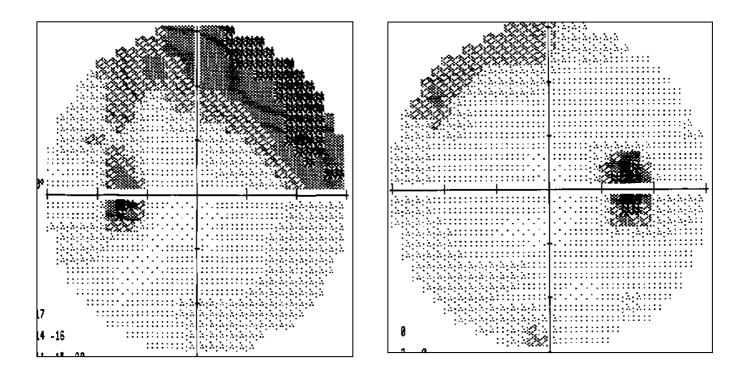

b. How many visual tests are required before they become reliable?

Question 12

What makes you suspect a neurological field?

Does this patient have glaucoma?

What has happened to this patient's visual field and why?
